About Myself

Multilingual software developer born in Spain now living in South Korea, I spent the 2 first years of my career working for the video game industry and the last 3 years making web apps.

My current stack is vueJS, nodeJS and mysql on Linux but I enjoy learning and trying new technologies.

I love tinkering and trying out new things. I am looking for new challenges in a welcoming work environment.

Employment History

Backend Developer for Mobidoo, Seoul

February 2023—July 2023

I produced more than 200 endpoints, 2 full RESTAPIs, and detailed documentation. It was a pleasure to work with a diverse but specialized team.

I also had the opportunity to work as a Scrum Master, guiding the team to a more AGILE-oriented workflow.

Full Stack developer at SAIDLITE, Seoul

March 2020—March 2022

Developed a myriad of web applications using vue 2/3. Also written backends using Node.js and Express.js.

What I loved the most about this job was that I had the opportunity to learn a lot about networking technologies and I was free to use linux as my daily driver OS.

I had the opportunity to learn about DevOps and deployed many applications myself.

Junior Developer at Abylight Studios, Barcelona

January 2018—March 2020

Developed high quality iOS and Apple Watch projects.

My main role was automating work and helping my colleagues to be more productive when assimilating 3D assets on challenging environments.

IT internship at Catalonia hotels & resorts, Barcelona

February 2016—August 2016

Managed and maintained a network of more than 2000 workstations and other POS machines all across the world.

Education

HND in VideoGame development,CEV Barcelona, Barcelona

September 2016—August 2018
